

Updates from UWCCC Shared Resources (SR) on Current Operations

[UWCCC Shared Resources](#)

SR that are maintaining a level of on-site operations to support approved research only* are following the current COVID-19 guidelines for safe distancing and disinfecting surfaces, including but not limited to: reduced # persons in facility, persons at least 6 feet apart, frequent hand-washing, frequent disinfection of high touch surfaces. Current operations conform to UW Research Reboot Phase 2 guidelines (<https://research.wisc.edu/research-reboot-phase-2/>) as well as School/Department directives. Contact the individual SR for questions on their operations and capacity.

* Researchers accessing services on-site must:

- 1) have received approval for their research activities and included the shared resource in their research reboot application
- 2) have completed the required online COVID-19 Safety Training to do on-site work (<https://www.talent.wisc.edu/Catalog/Default.aspx?CK=68864>)
- 3) follow the reboot phase guidelines issued by the UW, as well as School specific reboot directives and the individual SR reboot operations plans

Shared Resource	As of Date	Current Operations
Biostatistics Shared Resource (BSR)	3/23/2020	All staff in BSR are telecommuting. Investigators should reach out to us via email, and continue to submit biostatistics consultation requests via the online portal request system available at: https://ictr.wisc.edu/consults/biostatistics-2/
Cancer Informatics Shared Resource (CISR)	4/2/2020	All staff in CISR are telecommuting. Reach out via email for any of your needs. They are also available via WebEx and Microsoft Teams.
Cancer Metabolomics (CaMetab)	7/23/2020	CaMetab is available by email/webex to coordinate ongoing and future projects. Lab work activities are happening at ~50% of normal.
Cancer Prevention and Outcomes Data (C-POD)	5/14/2020	All C-POD staff are telecommuting. Please reach out via email, Webex or Microsoft Teams.
Circulating Biomarker Core (CBC)	8/6/2020	CBC has staff on rotations, with reduced services, and no face-to-face consults. Clinical trial sample processing services are still being provided to approved clinical research. Advanced notice for clinical sample draws is appreciated to help us coordinate staff availability. Research samples are being processed on a somewhat limited basis under the current Research Reboot Phase II occupancy restrictions.
Clinical Research Imaging Core (CRIC)	4/8/2020	CRIC staff is working remotely, with HealthLink access and in close contact with the UWCCC CRCO to address any clinical trial needs. CRIC and Radius services are continuing as if we were in the office, at this time all of our services are still open to approved clinical research with as little slow down as is reasonable given telecommuting.
Drug Development Core (DDC) - Cancer Pharmacology Lab (CPL)	6/19/2020	CP Lab Sample Acquisition Service is open and operating with limited on-site staff for approved clinical research. Access to the lab is restricted and kits should be left on the cart outside of K4/559 before 3pm each day. If there is any visible PHI on the outside of kits, please call us ahead so that they will not be sitting unattended in the hall. If you have specimens to drop off, please call ahead for those as well. FedEx is no longer picking up at our location. They are requesting packages be down at the loading dock by 3pm now. We may not be able to accomodate same day shipping for mid to late afternoon visits. CP Lab Analytical services are operating under restricted access Research Reboot operational guidelines. Please visit the CPL webpage for information on use of equipment: https://cancer.wisc.edu/research/resources/ddc/cancer-pharmacology/
Drug Development Core (DDC) - Medicinal Chemistry Center (MCC)	6/23/2020	The MCC has opened in a limited capacity some of our shared instrumentation to trained users, although there are some new processes in place for sanitizing and social distancing. No training on equipment will occur in Phase 1 re-opening of research. Projects are anticipated to resume in Phase 2. Any inquiries can be directed to john.feltenberger@wisc.edu .
Drug Development Core (DDC) - Small Molecule Screening Facility (SMSF)	3/24/2020	We are partially shut down. No face-to-face meetings or consults. All of our walk up instrumentation remains available for use. We can run experiments, and work with existing clients, on projects on a case by case basis.
Experimental Animal Pathology Lab (EAPL)	7/15/2020	The EAPL is currently operating under restricted access Research Reboot operational guidelines. Access to the lab is restricted, scheduled face-to-face only. Please visit EAPL's webpage for more information: https://cancer.wisc.edu/research/resources/epl/
Flow Cytometry Lab (Flow)	7/15/2020	The Flow Lab is operating under current restricted access Research Reboot operational guidelines. Please visit the Flow Lab's website homepage for details on operations: https://cancer.wisc.edu/research/resources/flow/uwflow@uwcarbone.wisc.edu
Genome Editing and Animal Models Core (GEAM)	7/20/2020	GEAM is operating under current restricted access Research Reboot operational guidelines. Please visit GEAM's webpage for more information: https://www.biotech.wisc.edu/services/geam . For questions Contact Kathy Krentz at kkrentz@wisc.edu or Dustin Rubinstein at crubinstein@wisc.edu .
Glasswash	7/15/2020	The Glasswash Facility is operating at reduced capacity under current Research Reboot operational guidelines. For service, please email Willie at wdkeith@wisc.edu .
Microtechnology Core (MTC)	3/24/2020	The MTC is closed until further notice.
Pharmaceutical Research Center (PRC)	3/19/2020	PRC is working closely with the UWCCC CRCO to address any clinical trial needs; information on PRC ops is being sent to clinical research teams via the CRCO.
Small Animal Imaging and Radiotherapy Facility (SAIRF)	9/14/2020	All SAIRF equipment, whether self-service or full-service, is available. SAIRF staff can be reached via email: sairf@uwcarbone.wisc.edu . When using the facility, it is required that all people wear gloves, disinfect all handles and surfaces with the 70% ETOH that is provided and wear a surgical mask. B1334 & B1335 are each limited to 2 people occupying the space and only 1 person at a time in B1334C, B1576, B1578, and 3118B. Only 1 person is allowed in WIMR 1220 while conducting analysis.
Translational Science BioCore (TSB) - BioBank	7/17/2020	The BioBank is operating under current restricted access Research Reboot operational guidelines. Please visit the Biobank's website homepage for details on operations: https://cancer.wisc.edu/research/resources/tsb/biobank/ For questions, or to schedule a clinical trial collection/pick-up/drop off, contact the BioBank at: biobank@uwcarbone.wisc.edu or 608-262-4303.
Translational Science BioCore (TSB) - Translational Research Initiatives in Pathology Lab (TRIP)	8/7/2020	The TRIP lab is currently operating under restricted access Research Reboot operational guidelines. Access is restricted to the lab. Meetings and consultations are scheduled via Webex. One-on-one training services are available via Webex remote training. To schedule Nuance/inForm services e-mail Karla at kesbona@wisc.edu . Mask is required to enter/use the computer lab and only one trained user can use this room at a time (WIMR 2214A). Sample drop off/pick up will be by appointment only. Staff will be working remotely when not in the lab and questions can be directed to: trip@pathology.wisc.edu .
