

NET TMA:

- Neuroendocrine Tumors- Assorted Body Sites/Histologies
 - 336 cancer cases in duplicate cores
 - Cases are grouped by anatomic location; anatomical locations include:
 - Lung
 - Nervous System
 - Gastrointestinal System
 - Reproductive System
 - Endocrine System
 - All 336 cases are represented over a total of 4 TMA blocks identified as NET1, NET2, NET3, NET4

- Includes demographics, clinical and pathological staging, treatment, recurrence, disease free survival, and overall survival

- **TMA tiers** indicate an approximate percentage of cores represented on each TMA slide, where:
 - Tier 1 has the least core loss with $\geq 80\%$ cores present,
 - Tier 2 has $\geq 50\%$ but $< 80\%$ present, and
 - Tier 3 has $< 50\%$ cores present.

- TMA Fee Schedule (per slide):

Membership	Tier 1	Tier 2	Tier 3
UWCCC	\$400	\$200	\$100
Non-CCC (UW)	\$480	\$240	\$120
